

Inducting, Wetting & Dispersing

The Ystral Conti-TDS from Powder Technologies Inc. operates dust-free and loss-free, providing immediate powder wetting and effective dispersion with complete de-agglomeration. The company says that the solution also offers:

- Dust-free powder induction from bags, bulk bags, containers or silos.
- Adaptation to one or several vessels — stationary or mobile — with existing systems installation.
- Induction rates up to 800 pounds per minute and shear speed up to 100 feet per second with shear gradient 50,000 sec.⁻¹.
- Clean-in-place without disassembly.
- Transfer to storage tanks with the same machine.
- Easy integration into existing processing systems.
