

New & Improved Process Control Software

Zontec Inc., developer of Statistical Process Control (SPC) software solutions, now offers an updated version of Synergy 1000™. The company says that this new version offers:

- A “Send to Email” command for all reports and charts.
- Capability to add Input ID(s) and/or Note(s) from the control chart.
- Automatic scaling of Y-axis on run charts based on specification limits or data values.
- Direct importing of .txt or .csv files in Data Tables.
- Box and Whisker chart generated for each observation within a Data Table.
- On-screen numeric key pad option for data input.
