

Ultra Ultrasonic Flowmetering

Dynameters Shanghai Co.

manufactures transit-time ultrasonic flowmeters, doppler ultrasonic flowmeters, ultrasonic water meters, ultrasonic heat meters, and partially filled pipe and open-channel ultrasonic flowmeters. Features include:

- High-temperature transducers suitable for liquids from around -40° to 250°C.
- An accuracy of 1.0 percent of reading.
- Compliance with ISO9001:2008, as well as CE and ATEX certification.
- Calibration before delivery via a Satorius weighing system.
