

Free-Float Traps

TLV Corp.'s durable free-float trap is an excellent choice for plants with corrosive environments, refineries and petrochemical plants where steel materials are required. According to the company, the trap is characterized by:

- All stainless steel construction.
- Self-modulating Free Float®, which delivers continuous, smooth, low-velocity condensate discharge as process loads vary.
- Inline repairable design that provides simple cleaning and lower maintenance costs.
- Unique rotational seating design.
- Durable thermostatic air vent automatically vents air for an exceptional start-up.
- Availability in ½-, ¾- and 1-inch in NPT.
