

Fuming over Vapors & Gases?

AirClean Systems' new PATRIOT™ ductless hoods use bonded carbon filtration to capture fumes, vapors and gases. According to the company, these hoods:

- Can be placed virtually anywhere without the need to connect to building infrastructure.
 - Are constructed of chemically resistant polypropylene.
 - Feature the AirSafe™ NXT touchscreen controller.
 - Provide versatility and flexibility.
- Are available in multiple widths, heights, depths and sash configurations.
