

A Mill for Myriad Applications

FRITSCH introduces its PULVERISETTE 6 *Premium* planetary mono mill for wet and dry grinding, mechanical alloying, mixing and homogenizing with reliable results down into the nano range. According to the company, the PULVERISETTE 6 *Premium* is further equipped with:

- High centrifugal acceleration for fast, high-performance grinding.
- A more powerful and safer design due to double drive power and automatic clamping of the bowls.
- Fully automatic grinding bowl imbalance compensation.
- ServoLOCK motor-driven grinding bowl clamping.
- A convenient touchscreen with a color display.
- Tightly sealed grinding bowls — even under overpressure — also outside the mill.
- Easy operation.
