

Non-Metallic Enclosures

Integra Enclosures' 24 by 24 by 10 NEMA enclosures meet customer needs for larger-scaled application protection solutions. According to the company, these enclosures are:

- Part of the Genesis line.
- Non-metallic NEMA 4X and UL-rated.
- Made of high-impact, UV-resistant polycarbonate materials.
- Characterized by flexible interior mounting using the patented adjustable swing-panel mounting system.
- Offered with multiple bosses, allowing for easy installation of devices and DIN rails.
