

Waterproof LCD Workstation

Comark Corp. has enhanced its 19-inch All-in-One Waterproof Workstation, which is designed for harsh factory floor environments. According to the company, the new workstation:

- Is ideal for applications where process splashing, spraying, or high-pressure wash downs occur.
- Is completely sealed against the elements, corrosion resistant and constructed out of rugged stainless steel.
- Now includes finned heat extrusions to allow additional cooling for more processing choices.
- Features a resistive touchscreen, plentiful array of watertight external I/O connectors, Intel ATOM or i5 processing capability, hard drive or solid state storage options, thin client configuration option, Windows 7 operating system and universal VESA mounting pattern.
