

Portable Combustion Analyzer for Emissions Monitoring

E Instruments Intl.'s E5500 combustion analyzer is a portable emissions-monitoring tool for regulatory and maintenance use in boiler, burner, engine, turbine, furnace and other combustion applications. The company says that the analyzer includes:

- Electrochemical gas sensors — O₂, CO, NO, NO₂, SO₂.
- Low NO_x and true NO_x capable.
- Real-time PC software package with wireless communications.
- Wireless remote printer.
- External water trap assembly.
- Stack gas and ambient air temperature measurements.
- Draft and differential pressure measurements.
- Efficiency, excess air and CO₂ percent calculated values.
