

# Portable Combustion Analyzer for Emissions Monitoring

E Instruments Intl.'s E5500 combustion analyzer is a portable emissions-monitoring tool for regulatory and maintenance use in boiler, burner, engine, turbine, furnace and other combustion applications. The company says that the analyzer includes:

- Electrochemical gas sensors — O<sub>2</sub>, CO, NO, NO<sub>2</sub>, SO<sub>2</sub>.
- Low NO<sub>x</sub> and true NO<sub>x</sub> capable.
- Real-time PC software package with wireless communications.
- Wireless remote printer.
- External water trap assembly.
- Stack gas and ambient air temperature measurements.
- Draft and differential pressure measurements.
- Efficiency, excess air and CO<sub>2</sub> percent calculated values.
