

Versatility, Performance & Dependability

Chemineer now offers an extensive line of side-entering agitators for application versatility. All of the company's side-entering agitators feature a variety of options for gearing and bearings, shafts and seals, housing and lubrication, belt drives and guards, and tank shut-off configurations. More specifically, according to the company:

- The Chemineer® HS gear-driven agitators are designed for maximum service life. They incorporate precision-machined, surface-hardened spiral bevel gear sets, high-capacity tapered roller bearings and heavy-duty output shafts.
- The Prochem® PB and MD belt-driven agitators provide easy-to-maintain configurations that minimize downtime and maintenance costs. They are suitable for a range of applications, including corrosive and abrasive environments, pulp and paper, and oil storage.
- The HE-3s and Maxflo WSE impellers complement the company's side-entering agitators, each offering unique performance characteristics for specific application requirements.
