

Infrared Pyrometer Calibrator

According to E Instruments Intl., its non-contact BBSL Black Body Calibrator offers a number of features, including:

- Temperature: 10°C above ambient to 350°C.
- Accuracy: ± 0.5 percent or minimum 1°C.
- Stability: ± 0.5 percent or minimum 1°C.
- Emissivity: 0.97 to 0.98.
- Auto tune PID controller.
- Stabilization time: 20 minutes.
- Calibration certification included.
