

## Containers with Various Levels of Accessibility

Meissner now offers its QuaDrum™ storage containers in 50-, 100- and 200-L volumes to support its One-Touch® single-use systems biocontainer assemblies. The company says that this polyethylene storage container is also characterized by:

- A slotted lid option that offers easy access to tubing and filters, while protecting the biocontainer assembly, and a solid-lid option that provides complete coverage of the biocontainer assembly and the highest level of security.
- A chemically resistant and easy-to-clean design.
- The flexibility to be ordered with custom stainless steel rolling dollies to enhance intra-facility mobility.
