

For Pumping High-Viscosity Fluid

Ingersoll Rand has launched its AFX™ air-operated piston pumps and systems with Progressive Exhaust™, a True Link Valve™, and integrated regulator technology used on 2-ball, 4-ball and chop-check pumps. According to the company, these reliable ARO force piston pumps also deliver:

- The ability to transfer shear-sensitive, viscous, corrosive and abrasive fluids in a range of critical process and industrial applications.
- 5- and 55-gallon rams for high-viscosity fluid.
- 4.25-, 6-, 8-, 10- and 12-inch air motors.
- Suitability for paint production to equipment lubrication.
