

# Simplifying Load Cell Wiring

Rice Lake Weighing Systems now offers its first mobile app for the weighing industry, which builds on the success of its mobile website. The company says that this solution:

- Helps industrial scale technicians decipher the wiring colors of almost any given load cell brand and model.
- Is now available as a free mobile application for smartphones, tablets and PCs.
- Is easy to use — the user simply selects the brand and model for their load cell and the app does the rest, showing which wires represent excitation, signal and sense lines.
