

3-A Sanitary Standard Certification

Powder Technologies has announced that the YSTRAL Conti-TDS, which offers powder induction, wetting and then dispersing of an agglomerate-free liquid all with 1 machine, has been certified by 3-A Sanitary Standards Inc. (3-A SSI) to meet its sanitary standards and carry the 3-A symbol. The company believes that the YSTRAL Conti-TDS is also characterized by:

- The ability of all product contact surfaces to be easily inspected, cleaned, sanitized and maintained.
- Dust-free and loss-free operation on the rotor/stator principle.
- Clean-in-place functionality without disassembly.
- Lower cleaning costs as a result of increased efficiency in equipment cleaning and even inspections.
- Suitability for the pharmaceutical, food, cosmetic and chemical industries.
