

From Critical Reactor Systems to Routine Storage

Chemineer® 20 HT agitators are available in right-angle configurations to meet a broad range of specific application requirements — from critical chemical reactor systems to routine storage. The company says that the 20 HT agitators are also highlighted by:

- Field-proven performance in blending, agitation, solids suspension and gas dispersion.
- High strength, low wear, quiet operation, and minimal maintenance.
- A high-efficiency gearbox designed specifically for agitator service.
- A modular design that reduces the number of replacement parts that need to be carried in inventory.
- Accommodations for harsh, demanding environments where reliability is a key consideration.
- Suitability for a variety of industries, such as chemical, pharmaceutical, water and wastewater treatment, ethanol and biofuels, food, general industrial and much more.
- A wide variety of mountings, shaft seals and impeller options.
