

The Nomad® Works Indoors & Outdoors

Nissan Forklift presents its Platinum II Nomad® Series lift truck with the flexibility to use the compact truck indoors and outdoors. According to the company, the Nomad additionally offers:

- Solid pneumatic tires that provide the ability to use the indoor truck outside on improved surfaces.
- A standard seat-actuated operator presence system that automatically locks lifting and tilting when the operator exits the truck.
- The maintenance of higher capacity retention than other standard pneumatic tire models their size.
- The company's K21 ultra-low-emission engine.
- Precise maneuverability, easy operation systems and rugged construction.
- A range of standard features and options for operator comfort and efficiency.
