

Automation Is Brewing

Intelligrated® provides automated material handling solutions for the brewery industry, integrating Alvey® palletizers and robotic solutions, conveyor systems, sortation solutions and advanced controls and software. According to the company:

- Intelligrated's Alvey brand has a 100-year history with the brewery industry and features rapid, reliable palletizing and case packing solutions designed to handle today's frequent packaging changes and increasing production volumes.
- The modular systems provide consistent, reliable and gentle product handling with minimal downtime.
- Intelligrated also offers complete warehousing and distribution automation including case and pallet-handling conveyor systems, sortation solutions, robotics and warehouse control software.
- The company's long list of brewery customers include craft brewers like Sierra Nevada, Lagunitas and Lost Coast as well as multinational corporations like AB InBev and Miller Coors.
