

Tailor-Made Material Handling Solutions

The BEUMER Group plans, builds and installs systems that are matched to the customer's individual requirements down to the last detail. According to the company:

- With its belt conveyors, among other things, the supplies economical and sustainable solutions for the conveying of bulk materials.
- The company is one of the leaders in curved belt systems and conveyors, used in open design in the form of troughed conveyors, or as an enclosed version in the form of tubular belt conveyors.
- The range includes the BEUMER paletpac high-performance layer palletizer for palletizing bags filled with bulk materials, a flexible unit that stacks PE and PP bags, layer-by-layer, on pallets of all common sizes up to a pack height of 2,400 mm with geometrical accuracy and extreme stability.
- The company has also developed a Warehouse Management System (WMS) that fulfills all the main requirements of the bulk materials industry such as the storage of sensitive substances, batch tracking and space-saving and cost-efficient warehouse management.
