

Electronic Tablet and Capsule Counter

The IMA Group will exhibit machines for the processing and packaging of pharmaceutical products. On display will be the SWIFTPHARM, an innovative multi channel electronic counter for tablets and capsules manufactured by IMA SAFE. Installed on the SWIFTPHARM will be the AV Colour Camera (AFC) for foreign product detection. The machine takes electronic counting and bottle filling to higher levels of speed and accuracy and delivers twice the output of existing multi-track counters for a given footprint. It has been designed to meet the highest standards of cGMP without the need for product contact change parts. The machine reaches a production output of 120 bottles/minute. A twin version of the machine, delivers twice the performance.
