

Mobile Logistics Management

Infor's enhanced version of Infor Supply Chain Execution (SCE) further reduces the complexity of warehousing and logistics management and clarify daily decision making.

- More than 100 new core industry features including mobile and voice enablement, visual metrics, and ION integration to ERP
- Helps provide a single, unified solution to meet warehousing, transportation, labor and 3PL billing needs
- Unites the strategic, tactical and operational elements of supply chain execution
- Empowers users to manage logistical needs
- Used across a wide array of industries including manufacturing, distribution, high tech, fashion, food & beverage and 3PL
- Features an innovative iPad app called Warehouse Director providing managers with a real-time view of warehousing activities
- App contains a color-coded metrics panel to better visualize management of incoming and outgoing workloads
- Location panel is equipped with inventory heat maps and zoom-able overviews of the warehouse floor
- Equipped with voice capabilities to allow users a hands-free approach for interaction within the supply chain
