

Multichannel Distribution & Order Fulfillment

Real Time Solutions order fulfillment systems from Intelligrated help solve the most demanding order fulfillment challenges found in today's manufacturing, warehousing and distribution center environments. The line of order fulfillment solutions includes:

- RF picking
- Pick-to-light
- Voice picking
- Mobile pick cart systems
- High-speed put systems
- Sophisticated order fulfillment software
- Warehouse control systems

Whether the application requires shipping direct to the consumer or replenishing stores, these solutions aid in determining the appropriate mix of picking technologies for an individual operation.
