

Pneumatic Pharmaceutical Conveyors

Volkmann, Inc. has a line of low-profile pneumatic pharmaceutical conveyors that features a purpose-designed low profile vacuum pump and reverse jet shock tank, providing a necessary solution for conveying tablets and capsules in restricted height areas. The ATEX-certified PPC250VS model includes a HEPA unit and a mobile trolley with pneumatic height adjustment. All Volkmann PPCVS units feature a one-piece, gap-free design with a smooth, polished stainless steel surface. Their modular, quick-release cGMP designs also allow for no-tools cleaning.
