

Tank/Hopper Weighing System

The CenterPoint series tank/hopper scales from Cardinal Scale utilize double-ended shear beam stainless steel load cells with center load design for efficiency in mixing, blending, batching, inventory control and general weighing. The bolt-in-place mounting assembly with articulating top plate makes them ideal for indoor or outdoor weighing applications. Available in three or four legged mounting assemblies with mild or stainless steel stands and self-checking sliding pin design, the load cell kits may be combined with one of Company's 200 series weight indicators for a complete digital weighing system. Features include:

- Environmentally-sealed, USA-made stainless steel load cells
