

Windows 8 Application for Manufacturing

Apriso's software, Apriso for Manufacturing, is the first Windows 8 application designed specifically for manufacturers. This application extends Apriso's manufacturing mobility and intelligence capabilities to Microsoft Windows 8 mobile devices, delivering plant by plant metrics to make better informed decisions, anywhere anytime. Windows 8-based mobile devices, made by Microsoft, Sony, HP, Dell, Samsung and others now have access to Apriso's complete suite of core FlexNet applications, including Production, Warehouse, Quality, Maintenance and Time & Labor. Customers gain the following benefits by using this new app:

- Greater flexibility to execute business processes from Windows 8 tablets and phones
- Expanded access to FlexNet to monitor system performance 24/7
- Simplified execution of maintenance or quality inspections
- Faster performance of exception handling or alert responses from an expanded variety of mobile devices
- Easier monitoring, analyzing and collaboration to improve operational performance
