

Auto Dryer for Fresh-Cut Produce

The redesigned Auto Dryer, from Key Technology, Inc., removes surface water from fresh-cut produce while enabling continuous line flow. Available in one-, two- and four-drum models, the system offers new controls, a new motor and a new structure that improves the dynamic operating condition.

- Removes moisture from fresh-cut produce gently and consistently to enhance product quality and extend shelf life
- Achieves fully automated, uninterrupted loading and unloading
- Handles from 1,100 to 3,000 lb (500 to 1360 kg) of product per hour per drum, depending on the product
- Unit effectively dries a wide variety of fresh-cut produce including baby leaf and cut leaf lettuce, cabbage, spinach, carrots, onions, peppers, whole green beans, herbs, and more
