

## High Powered LED Back Light

The WAL-M-3X48LED-120, from Larson Electronics, LLC, features three positional LED light heads, delivering 8,640 lumens, anchored by a stout aluminum frame and 600 pounds of magnetic grip.

- Equipped with three 48 watt LED heads that can be aimed independently
- Industrial grade LED light can be powered from a 120/277VAC power source
- Operators can disengage the power supply and operate the LED light heads from 12/24 Volts DC as well to deliver nearly 9,000 lumens over the work area
