

Sanitary Value Housings

Clear Lake Filtration's sanitary value housings are engineered to meet the sterile filtration demands of the food and beverage industry. Housing designs feature 10-25 Ra internal surface finishes and no wetted threaded connections, as well as electropolished mirror finishes.

- Designed for quick, frequent change outs with the proprietary, heavy duty STAClamp closure system
- Constructed of corrosion-resistant 316L stainless steel to ensure longevity and system purity
- Vent and drain valves are configured for easy cleaning and efficient sampling
