

Vibration Monitor Meter

A new BETEX professional VibChecker vibration monitor meter from Quality Bearings & Components (QBC) is a light and compact-sized instrument designed for quick and accurate vibration surveys. The meter, identified as the model TB-C780201, provides portable and user-friendly vibration measurement in the 10-1000 Hz frequency range.

- Measurement results are immediately and automatically evaluated against ISO standards
- Green, yellow, red LEDs indicate vibration severity
- A real time FFT spectrum is produced for easy pattern recognition
- Results can be stored for documentation and follow-up
- Built-in probe, easy button operation and clear symbols, VibChecker is an all-set-to-go instrument: just point the probe and measure to locate vibration-related problems
- Used to trend vibration levels on fans, motors, pumps, compressors and other types of rotating process machinery
