

Whiteness/Purity Tester of Powder Samples

The C130, from Kett, is a new instrument that provides instant whiteness testing of powder samples. The C130 is designed for use in laboratory, near-line process and remote QA/QC applications where quick, accurate determination of whiteness and/or purity is required.

- Instant whiteness/purity testing of powder samples
- Factory calibration and nine additional customer programmable calibrations
- 59 percent reduction in sample size
- 48 percent reduction in footprint
- More than 10x improvement in light source operation
- Lower cost of ownership
- Printer and/or PC output
