

Explosion Proof LED Light

Larson Electronics has released an explosion proof LED light designed to provide the operational benefits of LED lighting technology combined with the reliability of failsafe operation. The EPL-EMG-48-4L-LED-G2 explosion proof LED emergency light is fitted with second generation LED tubes for enhanced output and longevity.

- Built in battery backup system for continued operation even in the event of complete power failures and outages
- Provides operators in hazardous locations with a powerful and effective lighting solution
- U.S./Canada U.L. approved Class 1 Division 1 & 2 and Class 2 Division 1 & 2 for use in areas where flammable chemical and petrochemical vapors are present
- Carries paint spray booth certification with a T6 temperature rating
- Housing is formed from copper free aluminum for light weight and high strength
- Heavy gauge aluminum reflectors with a high gloss finish for durability and excellent light dispersal
