

# Magnetic Separators

Chem.Info Staff

Items in the low-cost ProGrade® series of magnetic separators from Eriez® are available at three different degrees of magnetic strength, enabling professionals in diverse industries to choose the ideal level of protection for their specific application.

- Offers ProGrade Ceramic series, ProGrade Rare Earth series and ProGrade Xtreme® series.
- Includes standard magnetic plates, grates, traps and tubes
- ProGrade Ceramic series is designed for general industry assemblies and targets the removal of medium to large ferrous contamination
- ProGrade Rare Earth series is ideal for improving product purity in general industry and some food and chemical applications, targets small, fine and weakly magnetic ferrous contamination
- ProGrade Xtreme series is designed for food and pharmaceutical-grade assemblies offering the ultimate in ferrous contamination removal, the finest materials and construction techniques
