

Wireless Adapter

Siemens Sitrans AW210 WirelessHART adapter has received an explosion proof rating for intrinsically safe (Ex ia), nonincendive (Ex nA) and explosion proof (Ex d), offering increased safety in hazardous areas, along with the benefits of field level transparency and flexibility for process industries.

- Allows up to eight standard wired HART devices or one 4-20 mA to be connected to a WirelessHART network
- Integrated power management enables efficient usage of external batteries or energy harvesting components like solar panels
- By installing on an existing analog-wired HART device, users can utilize all diagnostic information at the maintenance station without the risk of impaired operation
- Offers plant operators increased plant transparency, productivity and performance, with common applications
