

Ball Screw Guide Linear Rail

Haydon Kerk Motion Solutions has introduced the latest addition to its new BGS (Ball Guide Screw) linear rail product line. The BGS06 linear rail with the integrated IDEA Drive is a versatile system utilizing the popular size 17 single stack or double stack stepper motor linear actuator with an integrated and fully programmable stepper motor controller.

- All BGS rail systems utilize linear stepper motors
- Precision rolled 303 stainless steel lead screws
- Lead screws are coated using Black Ice® TFE coating providing a wear-resistant and maintenance-free dry lubrication
- Lead screw drives a precision nut embedded in a machined aluminum carriage mounted to a stainless steel ball rail
- BGS06 with the integrated IDEA Drive is available
