

Bio-based Rust Remover

Cortec's patented VpCI®-422 technology is a bio-based, non-toxic, rust remover. By using VpCI®-422, any etching, profiling, or abrading effects on metal surfaces are avoided. Unlike conventional rust removers that are dangerous to use, handle, and store; VpCI®-422 is a completely organic.

- A 100% biodegradable product
- Harmless to people and the environment
- Effectively removes rust and tarnish from all metals
- Does not create waste disposal difficulties
- Ideal for outdoor and marine applications where chemical waste disposal is a large and costly problem
