

Bottle Unscrambler

Chem.Info Staff

Omega Design Corporation's bottle unscrambler features patented rotary pockets and provides speed, precision and expandability. The machine is versatile and easily handles various shapes of bottles, operating at various speeds.

- Changeover between runs is quick and simple
- Handles printed or pre-labeled bottles at speeds in excess of 300 per minute
- Processes bottles ranging in size from fractional ounces to 32 ounces
- Runs fully automatically and can operate at variable speeds
- Includes patented self-adjusting rotary pockets, Allen Bradley controls, a stainless steel frame, clear guarding and noise reduction
- Electromechanical positive-break safety interlocks, easy-load floor level hopper design, flow-track elevator and rotary disc-style sorter come standard
- Touch screen interface displays a product menu for streamlined and intuitive operation
