

## Data Logger Bench Top Display Unit

Rotronic Instruments's CL11 data logger bench top display unit is an inexpensive multimeter that simultaneously measures and records CO<sub>2</sub>, humidity and temperature. Equipped with the field-tested ROTRONIC HYGROMER® IN-1 humidity sensor.

- Uses the ROTRONIC software package SW2.x
- Can be easily set to record as required and data can then be downloaded, saved and analyzed
- 40,000 data point memory for CO<sub>2</sub>, humidity and temperature values
- Maximum, minimum and average values displayed
- Adjustable audible and visual CO<sub>2</sub> alarm
- Real time clock
- Optional external temperature probe
- Includes software for configuration and data download
- CL11 data logger evaluates air quality with the combined measurements of CO<sub>2</sub>, humidity, and temperature
