

Environmentally-Friendly Cleaning Product

Earthecco's environmentally-friendly cleaning product is taking a green approach to cleaning at the industrial level, and it is formulated from all-natural plant extracts, reducing the need for harmful and toxic chemicals in various industries and for the home user.

- Water-based product will chemically balance dangerous gases, such as Hydrogen Sulphide and Ammonia
- Assists with sanitation, breaks up fats and solids, neutralizes odors and toxic gases on contact
- Reduces greenhouse emissions and benefits the environment through carbon footprint reduction
- Converts gases into harmless inorganic salts and complex organic molecules that pose no risk to humans or animals
