

Graphic Display Panel Meter and Logger

Designed and manufactured by Omega, the Dpi1701 series of 1/8 DIN monochrome, high resolution graphic display panel meter and data logger for temperature and process measurement.

- CE compliant product
- Features optional alarm relays, isolated analog output, isolated 24Vdc excitation voltage and wireless receiver
- Records 85,000 data points with time & date stamping
- Logging starts/stops based on time and date, alarm 1 or 2 status, or a key press
- Monitors and displays minimum and maximum process values
- Process input is displayed in horizontal bar graph, line graph charting or standard digital format
- In Chemical industry, it can measure, monitor, and graph the temperature of a process
- In Oil & Gas industry, it can measure, monitor, and graph the line pressure
- In research labs, it can measure, monitor, and graph precision RTD sensor profiles
