

Infrared LED Light Bar

The LEDLB-60ET-IR infrared LED light bar from Larson Electronics provides professionals with a powerful and rugged infrared lighting solution that can help improve the performance of night vision gear, security cameras, and other devices that rely on invisible infrared illumination.

- High output infrared LED light bar
- Designed to produce invisible infrared light that can only be seen with the aid of night vision equipment
- 850Nm for use with common security cameras and night vision goggles
- Sixty Edison Edixeon® 3 watt infrared emitters that have been specially paired and arranged with high efficiency optics
- Produces an infrared beam reaching 1,450 feet in length and 240 feet wide
- Also be ordered in floodlight configuration to produce a beam 490 feet long by 450 feet wide for applications where wider coverage is desired
- Housing on this light bar is formed from extruded aluminum for light weight and high strength
- Unbreakable polycarbonate lens provides excellent protection against scratching and damage from impacts
