

LED Blasting Light

Larson Electronics' high performance LED blasting light is designed to provide high output from a small form factor and is easily attached to metallic surfaces. The light is ideal for operations where cumbersome tripod or platform work lights are impractical.

- Shatterproof polycarbonate lens
- Magnetic mounting base with 200 lbs of grip that keeps light in place even under heavy vibration and movement
- Steel trunnion bracket that allows vertical adjustment once positioned
- High-power illumination with thirty 3-watt LEDs for 5,000 lumen output while using only 75 watts
- Versatile mounting capabilities, allowing operators to mount the light to any surface constructed of steel, iron, or any material which will accept a magnet
- Heavy-duty IP68 waterproof aluminum housing that has been powder-coated for added durability
