Matched Motor/Drive Combination Package

Siemens Industry, Inc. announces the release of combination motor/drive packages, allowing an OEM or end-user the option to select the optimum solution for a variety of heavy-duty industrial motion control applications from a single source, backed by a full three-year warranty.

- Choose from a pre-determined list of motor/drive combinations
- Customer simply makes the selection best suited to the application
- Motor and drive are packaged on a single pallet, shipped and invoiced together
- Motor and drive combinations are power-matched for 480V high-overload operation through a 20 hp range
- I2T protection from thermal damage provided as a standard in both the motor and the drive components
- Intelligent Operator Panel (IOP) is included with these packages, allowing easy step-by-step drive start-up
