

Recovery Analyzer

Metso's recovery analyzer, the Metso Metra, applies advanced online measurement and can react faster to disturbances and increase process output. Metso Metra represents the latest generation of fully automatic titrators for chemical recovery optimization.

- Well-proven causticizing measurements
- May feature unique online reduction degree measurement technology as an option
- Analyzer with process optimizing controls, enables more environmentally friendly recovery boiler operation
- Higher process throughput
- Maximum uptime
- Savings in makeup and cleaning chemicals and fresh lime costs
