Tablet Counter

Chem.Info Staff

NJM Packaging's tablet counter is a versatile servo driven counting and filling system for solid-dose pharmaceuticals. The counter features a modular design that handles almost any size tablet, capsule or softgel and fills almost any bottle.

- Accommodates up to four counting modules
- Fills up to 170 bottles per minute (bpm), based on 60-count bottles
- Achieves 100 percent counting accuracy
- Features six discharge channels
- Easily modified modules
- Feedscrew and "dipping" filling nozzles
