

Molded Components, Single Use Products & Process Hoses

AdvantaPure features many solutions for pharmaceutical and biopharm processing. The company specializes in single use molded manifold assemblies for batch filling and sampling, flexible process hose assemblies, BioClosure® molded container closures, platinum-cured silicone tubing and reinforced hose, and AdvantaFlex® biopharmaceutical grade TPE tubing.

- Molded manifold assemblies are ISO certified
- Class 7 clean room manufactured from tubing and molded fittings such as tees, wyes, reducers, crosses and hygienic union clamps (commonly known as Tri-Clamps®)
- Molded connections provide a smooth inner surface for unrestricted fluid flow and eliminate many barbed fittings, which lessens the risk of a wasted batch of costly pharmaceutical product due to fitting leakage
- When used as single use process systems by manufacturers of vaccines, medications, vitamins and supplements, the molded assemblies reduce cross contamination, simplify cleaning validations, increase production time, and decrease costs
