

## Bulk Flow X-Ray System

The E-Z TecXR-Bulk X-Ray Inspection System is designed for continuous product streams and inspects for unwanted foreign objects such as metal, stone, glass, bone and some plastics. The system includes tool-less disassembly for cleaning, multi-lane inspection, compact 60-inch overall length, low profile design and auto learn capabilities. The system can identify contaminants, scanning for missing or broken products and performs mass inspection to ensure users' product and packaging integrity.
