

Dust Collector Skid Packages

Camfil APC's Farr Gold Series® dust collection systems are offered in a skid package that speeds and simplifies installation. The new skid packages incorporate high efficiency cartridge dust collectors and all related equipment onto a single platform that is easy to transport and install. The packaged units offer time and cost savings to the food processing industry, especially when needed to facilitate installation of multi-component dust collection systems. A typical skid package might include:

- One or more dust collectors
- Active and/or passive explosion protection devices
- HEPA safety filters
- Fans
- Controls
- Interconnecting ductwork
