

High Performance Top Discharge System

Arena Products is proud to partner with Unifiller Systems for the release of their new Starfish Pump, a cost effective and easy-to-integrate top

discharge pumping system. Meant to improve efficiency by adding automation, reducing product waste, minimizing change-over and downtime time, the system has been enhanced to meet the sanitary requirements of the industry. The entire system is designed for handling viscous products with minimal residual, and can move the product within a filling system well.

Design enhancements include:

- 316 stainless steel product pump
- Mobile, tool free design for quick set up, disassembly and changeover
- Powerlift for easy integration
- Lift controls separate from pump activation
- Specially designed interconnects
- Interchangeable component kits so the same base can be used from product to product
