

Wipes Holder

JNJ Industries' SmartHolder was designed specifically for JNJ's SuperSaturated SmartWipes® canisters, to keep them readily available and easily accessible. The SmartHolder is made from rugged spring steel wire that expands easily for loading and unloading the canister. Each holder features:

- White powder coat finish providing a clean and professional look that is suitable for all professional environments
- Wall-mounting plate on the back side of the holder, as well as a bench mounting plate located on the bottom side of the holder
- 3" x 3" adhesive pad for quick installation without the need for tools
- Ability to be grounded for use around sensitive electronic devices when antistatic requirements must be met
